APU EMERGES AS THE FIRST QS 5-STARS PLUS UNIVERSITY IN MALAYSIA

APU is the First Malaysian University to achieve an overall rating of Five Stars Plus in the latest QS Stars Rating awards that were presented at the QS Apple Conference on 1st Nov 2021. Five Stars Plus institution must achieve five stars across all categories in addition to achieving minimum highest benchmark score by QS STARS. APU is amongst 19 universities worldwide to achieve this honour.

RANKED TOP 3 FOR INTERNATIONAL STUDENTS (QS WORLD UNIVERSITY RANKING ASIA 2022)

APU is Ranked Top 3 for International Students, Top 5 for Inbound Exchange, and is amongst the Top 30 Universities for International Faculty. APU is also Ranked amongst the Top 270 Universities in Asia.

Online Learning

APU AWARDED 5-STAR RATING FOR ONLINE LEARNING

APU awarded 5-Star Rating for Online Learning in the latest QS Stars Rating System - the highest possible rating in this category. It demonstrates APU's continued focus in providing interactive, student-centred, and flexible digital learning using innovative technologies that enable its students to learn seamlessly and meaningfully - anytime, anywhere.

APU'S LIST OF FIRSTS:

1st Local Institute awarded Multimedia Super Corridor Status

1st Institute awarded the MSC Research & Development Grant

1st Institute awarded MS ISO 9002 Quality Certification

1st Institute appointed Novell Education Academic Partner

1st Institute appointed Authorised Sun Education Centre

1st Institute appointed Microsoft Training Partner

1st Institute listed in Enterprise 50 Award Programme

1st Institute appointed University Alliance Partner by SAP

1st XR Studio - Mixed & Extended Reality Infrastructure in Asia

1st Integrated Cybersecurity Talent Zone in Malaysia

QS defines rating as "The system evaluates universities across a wide range of important performance indicators as set against pre- established international standards. By covering a broader range of criteria than any world ranking exercise, QS Stars™ shines a light on both the excellence and the diversity of the rated institution".

"The QS Stars university rating system audits and rates over 600 universities globally in a broader range of criteria than any world ranking exercise. Comprehensive audits are also independently carried out as part of the rating exercise. QS StarsTM shines a light on both the excellence and the diversity of the rated institution. Congratulations to Asia Pacific University (APU) for being the first-ever QS 5-Stars Plus rated institution in Malaysia and being 1 amongst 19 in the world."

Leigh Kamolins - Head of Evaluation, QS Intelligence Unit

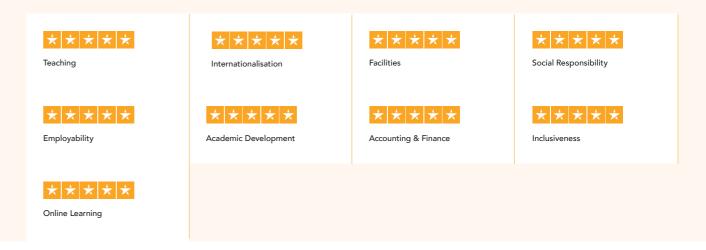

Rated for Excellence

Asia Pacific University of Technology & Innovation

The QS Intelligence Unit has, through rigorous and independent data collection and analysis of performance metrics as set out in the QS Stars™ methodology, rated Asia Pacific University of Technology & Innovation as a Five Stars Plus institution.

The QS Stars™ rating system is operated by the QS Intelligence Unit, the independent compiler of the QS World University Rankings® since 2004. The system evaluates universities across a wide range of important performance indicators as set against pre-established international standards. By covering a broader range of criteria than any world ranking exercise, QS Stars shines a light on both the excellence and the diversity of the rated institution.

Leigh Kamolins, Head of Evaluation

Experience

APU's iconic campus

Asia Pacific University of Technology & Innovation (APU) is amongst Malaysia's Premier Private Universities, and is where a unique fusion of technology, innovation and creativity works effectively towards preparing professional graduates for significant roles in business and society globally.

An Ultra-modern Campus Built Today for the Needs of Tomorrow

Asia Pacfic University of Technology & Innovation (APU)'s Ultra-Modern University Campus in Technology Park Malaysia (TPM) is designed to be the state-of-the-art teaching, learning and research facility providing a conducive environment for students and staff. TPM is the ideal location for this new and contemporary campus due to its strong positioning as Malaysia's primary hub for leading-edge and high-tech developments in a wide variety of areas. It is also located in one of the most rapidly developing areas in Kuala Lumpur, and is well served and accessible through major highways, LRT and other forms of public transportation.

APU has earned an enviable reputation as an award-winning University through its achievements in winning a host of prestigious awards at national and international levels.

Malaysia's Award Winning University

- · A Stylish Blend of Functionality & Accessibility
- A Unique Fusion of Technology, Innovation and Creativity
- Cutting-edge Technologies
- A Wide Variety of Spaces to Learn, Engage & Transform

APU's iconic campus is setting a new benchmark for design excellence among Malaysian Universities, combining an eco-friendly campus with a dynamic blend of technology and innovation to enable professional learning. It is a magnificent teaching & learning space for our Students & Staff designed by our award- winning architects & consultants.

Employability*

100% of our graduates are employed by graduation*; this is not just a number, but a significant symbol of our success and pride in nurturing professionals for global careers.

* Latest Graduate Tracer Study by Ministry of Higher Education, Malaysia.

Outstanding Support

Regardless of the programme you choose, you will be supported by highly qualifed and enthusiastic professionals. Many enjoy an international reputation for their research and actively engage with leading names in the industry.

Industry Ready Graduates

The APU Career Centre connects and engages with over 12,000 Employers to ensure that our graduates are highly employable in both local and international corporations, as it closely supports APU students in both internship and career placement activities.

Work-ready, World-ready

Study with us and we'll equip you to become a world-ready professional, with the knowledge, attributes, skills and expertise that employers look for.

Employers are demanding that graduates not just have qualifications, but also have the experience and ability to contribute to the workplace. To meet these demands, APU develops programmes and partnerships with academic and industry partners, with a heavy focus on applied learning. This helps to ensure that the skills and knowledge taught at APU are up-to-date and in high demand.

Rated No.1

in Asia and Malaysia for Multicultural Learning Experience*

A Hub of Cultural Diversity

With more than 13,000 students from over 130 countries, we ensure that you will gain memorable experiences alongside the diversifed and colourful cultural environment. We have students from Asia, Central Asia, Middle East, Africa, Europe, Latin America and Oceania. Our International Students Support Centre helps you with the procedure to apply for your Student Pass before coming here. Upon arrival in Kuala Lumpur, you will be greeted with warmth by our friendly staff, who will pick you up and bring you to our campus.

Student Welcome Team

The Student Welcome Team was established by Asia Pacific University of Technology & Innovation (APU) to improve the arrival experience of international students in Malaysia. "Warm Welcome, Warm Hello, Warm What's up" is the theme of this ASK ME Team.

A Truly International Community

Just like the beautiful country in which we are located, APU is a rich blend of traditional and modern styles. We have developed a singular character

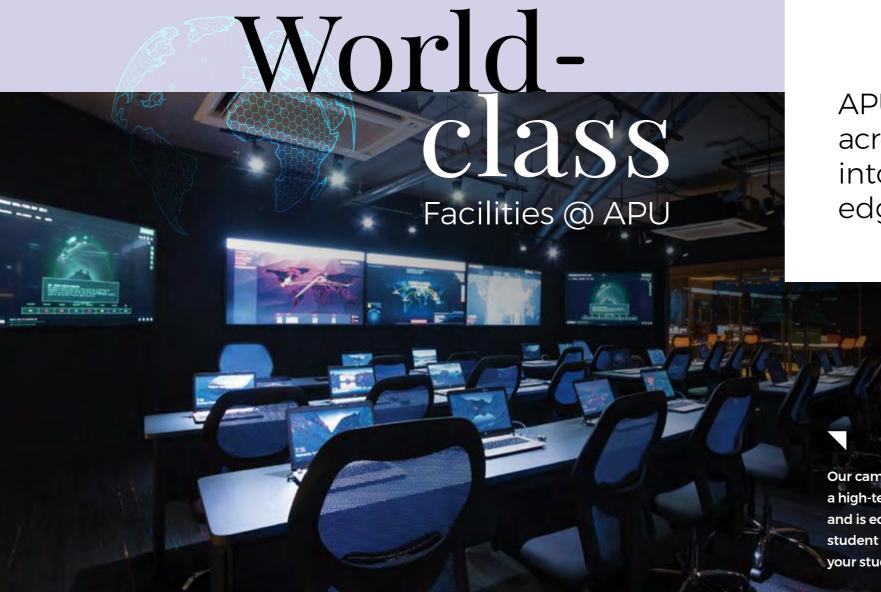

to embrace those things that set us apart. We pride ourselves on the quality of both our teaching and research as well as having a unique living and learning environment.

Student Life @ APU

Being a university student can be one of your most exciting expeditions. Higher education opens up a world of new ideas, intellectual growth, new adventures and the building of lifelong friendships. Here at APU, we support you to take the time to explore not only the educational experiences but also the wide range of social, sporting and cultural activities on campus.

Student Barometer Wave 2019 (International Students), 'Studying with people from other cultures'.

/ 12 / POSTGRADUATE STUDIES POSTGRADUATE STUDIES / 13 /

APU provides access to world-class resources across a wide range of disciplines. This translates into industry-ready skills and a competitive edge for graduates.

Our campus is well-situated in a high-technology environment, and is equipped to enable every student to get the most out of your study experience at APU.

An Integrated Community

The campus aims to establish a community aspect for the university - where integration is the key. Walkways, classrooms, communal spaces and discussion areas promote connectivity and cultivates exchange of ideas among students from different disciplines and academics, to implement cooperative learning concepts in line with the Industrial Revolution 4.0.

Cutting-Edge Technologies

The Campus blends technology, integration, innovation and creativity under one roof. It provides not just a learning environment, but also a lively community spot for our students to formulate new ideas, gain intellectual growth and discover new adventures. It is not only a university campus, but also the nurturing ground for world-changing global ideas. All spaces are carefully designed to create an unforgettable learning and lifestyle experience that lasts for a lifetime, while enabling professional learning and cultivating global mindsets. APU, as Malaysia's leading technological university, is the incubator for self-starting and innovative APU graduates. Our educational technology environment supports the development of graduates of this calibre, in which well-equipped computing and engineering laboratories with advanced software, hardware and technologies place students at the forefront of technological excellence.

Social Interaction Platforms

Fitness Sweatzone, student lounges, sports facilities and breakout rooms provide spaces for relaxation and socialisation throughout the day. They are carefully designed to create an unforgettable learning and lifestyle experience that lasts for a lifetime, especially for students who are studying away from home.

Our Partner in Quality

De Montfort University (DMU), UK

De Montfort University Leicester (DMU) is a dynamic, 21st-century UK university with a global outlook based in the city of Leicester.

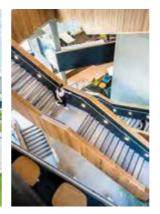

DMU recently celebrated its 150-year anniversary in 2020. The university has approximately 27,000 full and part-time students and 3,240 members of staff. The university is organised into four faculties: Arts, Design and Humanities (ADH); Business and Law (BAL); Health and Life Sciences (HLS); and Computing, Engineering and Media (CEM). The university prides itself on the support it offers students looking to gain work experience. In 2021, DMU's careers and employability service, DMU Works, was named the Best University Careers/ Employability Service at the National Undergraduate Employability (NUE) Awards.

- DMU has over 150 years of history in providing higher education to students from around the globe.
- Leicester offers students everything they could need, with the latest Student Living Index (compiled by NatWest) ranking Leicester in the UK top ten 'most affordable student cities'.
- DMU has been awarded a second term as a United Nations Academic Impact (UNAI) global hub for Sustainable Development Goals (SDGs), aimed at transforming lives around the world.
- Each year, international students from more than 130 countries choose to study at DMU.

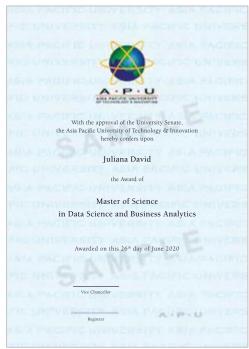

Double your Advantage

ASIA PACIFIC UNIVERSITY

APU-DMU Dual Degree Programme

APU's partnership with DMU enables students to be awarded Dual Awards - separate degree certificates from each institution - and enhances not just teaching and learning experiences, but also career

Upon graduation, students will receive 2 Degree Certificates & Transcripts: 1 from APU, Malaysia and 1 from DMU, UK.

Both degrees are recognised locally & internationally.

The APU-DMU Dual Degree Programmes are offered under an approved collaboration in accordance with the QAA UK Quality Code for Higher Education for the Assurance of Academic Quality and Standards in Higher Education as published by the United Kingdom Quality Assurance Agency (QAA).

POSTGRADUATE STUDIES

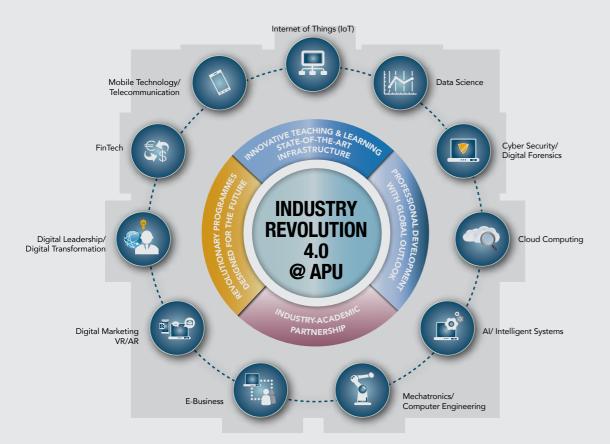

Embracing the wave of

Industry Revolution 4.0

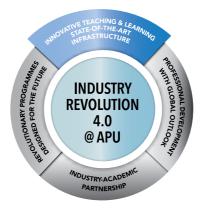

FUTURE-PROOFING THE WORKFORCE OF THE FUTURE

New waves of technological disruptions and the emergence of advanced technologies have resulted in the Fourth Industrial Revolution (Industry 4.0), where Robotics, Artificial Intelligence (AI), Machine Learning, Virtual Reality (VR), Cloud Computing, Internet of Things (IoT), Data Science are going to transform the way businesses operate – routine, mundane jobs will be replaced and there is a growing need to develop "smarter" talents that can ride along the wave of digital transformation.

At APU, we developed our own IR 4.0 strategy to prepare our students to join the workforce of the future. We nurture the world's future innovators and uphold our Vision as a University of Technology and Innovation.

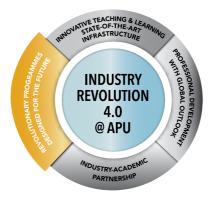

INDUSTRY REVOLUTION 4.0 @ APU

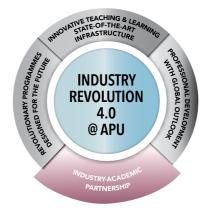

INNOVATIVE TEACHING & LEARNING STATE-OF-THE-ART INFRASTRUCTURE

In the era of Industry 4.0, learning is no longer confined within the classroom. Our iconic campus houses world-class facilities that aim to nurture Creativity & Innovation. Industrial-grade infrastructure are built to provide real-life exposure to our students, cultivating their practical skills aside from academic knowledge. We have also redesigned our teaching & learning methods to stimulate critical thinking, decision making, teamwork and build confidence.

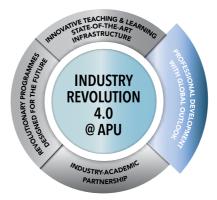

REVOLUTIONARY PROGRAMMES DESIGNED FOR THE FUTURE

New technologies mean new expertise, while this translates into a new need of talents in new areas. We address the needs of the industry, to help to build talents who can manage, operate and innovate under the new IR 4.0 environment, by carefully designing new programmes of the future. Our programmes are first-of-its-kind, such as in Cyber Security, Data Science, Internet of Things (IoT), Intelligent Systems, Digital Leadership, Digital Transformation, VR/AR, Financial Technology (FinTech), Digital Marketing, E-Business, Mechatronics, Telecommunication, Computer Engineering, Cloud Computing and more.

INDUSTRY-ACADEMIC PARTNERSHIP

Industry 4.0 is all about the "industry". Our close relationship with our industry partners allows students to be exposed to real-life case studies, enabling them to formulate innovative solutions even before they graduate. Innovative accelerators such as GrowthX Academy and Supercharger create a platform for students to realize their world-changing ideas, inspiring them to build startups and develop world-changing solutions.

PROFESSIONAL DEVELOPMENT WITH GLOBAL OUTLOOK

Communication skills, professionalism and cultural sensitivity are 'people' element skills that cannot be replaced by machines and automation. Under our unique formula to nurture professionalism, we create an ecosystem that simulates the workplace oncampus. Global outlook, international understanding and respect are nurtured through continuous immersion in multicultural discourse, as our campus houses a community of 12,000 students from over 130 countries.

And land that dream job

CMI is the Chartered Management Institute, dedicated to increasing the number of professionally qualified managers and leaders. CMI works with education providers to inspire students to unleash their potential and become skilled, confident and successful managers and leaders identified by their Chartered status.

CMI DUAL ACCREDITATION

You have the exciting opportunity of enrolling for the APU-CMI Dual Certification by registering for a qualification through APU. By adding a CMI qualification to your University qualification you are really on the road to

- Dual qualifications When you complete your studies you will have both your University qualification AND a CMI qualification.
- Theory into practice CMI qualifications are highly regarded by employers as a testament that you can demonstrate the practical skills needed to perform in the workplace.
- International stamp of approval CMI qualifications are linked to the QCF and European Qualification Framework, so you can be assured that the qualification you are taking is of the highest standard.

GIVE YOUR CAREER A HEAD START WITH

Benefits for CMI Accreditation & Dual Certificate:

APU Students will become CMI Affiliate Members for the duration of their course, and will be benefited with:

- · Access to CMI's online learning portal More than 1,000 journal articles, e-books, and practical digital resources to enhance learning.
- · Career Development Centre: Full access to online career development portal, enabling students to obtain free CV reviews, online interview training, online skills development as well as access to thousands of jobs and internships.
- · Mentoring Service: All students can benefit from a CMI mentor to support their studies or career aspirations subject to the availability of mentors.
- Fast-Track to Chartered Manager Status (after 3 years), and future CMI Fellow Status (after 10 years).
- · Students are able to receive a "Dual" CMI certificate for approved modules.

Benefits to the Student of a Dual Accredited Degree

Recent CMI graduates earn a median of £28k, compared to just £21k for a typical business studies graduate.

ENGLISH REQUIREMENTS (only applicable to International Students)

Please note that under Ministry of Education regulations, only students who have achieved the minimum requirement in the English Language proficiency assessment as indicated above will be allowed to continue their studies in the main study programme. Students who do not have the required English Language achievement may apply for a student visa on conditional basis and are allowed to enrol in an English Language Certification programme at APU upon arrival in Malaysia and, subsequently, appear for the IELTS/TOEFL/PTE/MUET assessment. Students who are unable to obtain the required level of English Competency during the maximum 12 months' period, will not be allowed to pursue their studies in the main programme and will have to return to their home country.

Students from English speaking countries and those with qualifications taught in English (previous Bachelor's/Master's Degree taught in English) are exempted from English requirements. Applications for exemption must be accompanied by supporting documents.

Note: The above entry requirements may differ for specific programmes based on the latest programme standards published by Malaysian Qualifications Agency (MQA)

Communications

Master of Project Management

- Bachelor's degree in related fields with a minimum CGPA of 2.50 as accepted by the Senate.
- Bachelor's degree in related fields with a minimum CGPA of 2.00 and not meeting CGPA of 2.50 can be accepted, subject to a rigorous internal assessment.
- Bachelor's degree in non-related fields with a minimum CGPA of 2.00 as accepted by the Senate and with relevant working experience, subject to a rigorous internal assessment.
- Bachelor's degree in non-related fields with a minimum CGPA of 2.00 as accepted by the Senate and without relevant working experience, subject to passing pre-requisite courses.
- English Requirements: IELTS 6.0

MSc in Information Technology Management
MSc in Software Engineering
Master of Science in Artificial Intelligence
Master of Science in Cyber Security

MSc in Data Science and Business Analytics

Master of Philosophy in Management #

- Bachelor's degree with minimum CGPA of 2.75 out of 4.00, or its equivalent qualification as acceptable by the Senate.
- Bachelor's degree with CGPA 2.50 out of 4.00, but below CGPA 2.75; can be accepted with rigorous assessment (include test, interview or portfolio).
- Bachelor's degree with CGPA below 2.50 out of 4.00, or qualification which is equivalent can be accepted with minimum 5 years relevant working experience in related field.
- English Requirements: IELTS 5.0
- English Requirements: IELTS 6.0 #

Notes:

- ^a Fundamental skills in programming, database, mathematics and statistics would be an added advantage
- Applicants without a Bachelor's degree or equivalent in Cyber Security or Forensic Computing must pass the perquisite modules in Cyber Security and Digital Forensics to continue with the Master's degree.
- * Applicants without a Computing-related Bachelor's degree must pass the pre-requisite modules to continue with the Master's Degree

Master of Science in Computing

(Bachelor's Degree must be in an area of Science and Technology related to Computing)

- Bachelor's degree with minimum CGPA of 3.00 out of 4.00, or its equivalent qualification as acceptable by the Senate.
- Bachelor's degree with CGPA 2.50 out of 4.00, but below CGPA 3.00; can be accepted with rigorous assessment (include test, interview or portfolio).
- Bachelor's degree with CGPA below 2.50 out of 4.00, or its equivalent qualification can be accepted with minimum 5 years relevant working experience in related field.
- English Requirements: IELTS 5.0

Master of Accounting Master of Accounting in Forensic Analysis

- Bachelor's degree with minimum CGPA of 2.75 out of 4.00, or its equivalent qualification as acceptable by the Senate.
- Bachelor's degree with CGPA below 2.50 out of 4.00, or its equivalent qualification can be accepted with minimum 5 years relevant working experience in related field.
- Relevant professional accounting qualifications equivalent to a bachelor's degree as accepted by the Senate.
- English Requirements: IELTS 5.5

Master of Finance

Master of Finance with a specialism in FinTech

(Applicants with Bachelor's Degree in Business, Economics, Software Engineering, Banking & Finance, Engineering, Actuarial Science, Mathematics and Statistics maybe considered for entry to the Master of Finance programme.)

- Bachelor's degree with minimum CGPA of 2.75 out of 4.00, or its equivalent qualification as acceptable by the Senate.
- Bachelor's degree in related field with CGPA below 2.75 out of 4.00 but above 2.50; or its equivalent qualification can be accepted, subject to a minimum of 5 years' working experience in relevant field
- Relevant professional accounting qualifications equivalent to a bachelor's degree as accepted by the Senate.
- English Requirements: IELTS 6.5

Master of Philosophy in Engineering

(Bachelor's degree in Engineering is required for entry to Master of Philosophy in Engineering)

- Bachelor's degree with minimum CGPA of 2.50 out of 4.00, or its equivalent qualification as acceptable by the Senate.
- Bachelor's degree with CGPA below 2.50 out of 4.00, or its equivalent qualification can be accepted with minimum 5 years relevant working experience in related field.
- English Requirements: IELTS 5.0

Master of Arts in Design Innovation Management

- Bachelor's Degree with Level 6, Malaysian Qualifications Framework (MQF) or a relevant field or its equivalent, with a minimum CGPA of 2.50 as accepted by the Senate.
- Bachelor's Degree with Level 6, MQF or CGPA below 2.50, or its equivalent qualification and a minimum of 5 years' working experience in relevant field.
- Other relevant qualifications equivalent to a bachelor's degree as accepted by the Senate and Pass an interview or submission of portfolio determined by the Senate.
- English Requirements: IELTS 6.0

Full-time - 1+ years Part-time - 2-3 years

This programme is specifically designed to provide:

- An opportunity for professional development at an advanced level within the area of software
- Enhancement of skills and knowledge in specialist areas for practising IT professionals.
- The ability to undertake large-scale IT software development projects.
- · The skills necessary to participate effectively in the design and implementation of software systems of high quality and reliability.

Career options

- Project Manager
- · Software Architect
- Senior Software Developer
- Solutions Architect
- Software Engineer
- Software Consultant
- Chief Technology Officer (CTO) • Development Manager
- · Senior System Designer
- Application Engineer
- Software Test Engineer
- Software Quality Assurance (QA) Specialist
- R&D Specialist
- Senior Technical Lead
- Product Specialist

MSc in **SOFTWARE ENGINEERING**

(R/481/7/0781)(02/27)(MOA/FA8836)

The Benefits of the Programme

On successful completion of this programme, vou will be able to:

- · Undertake and effectively manage largescale and complex software development
- · Participate in the design and implementation of software systems of high quality and
- Appreciate problems and suggest solutions associated with the development of software
- · Contribute to the advancement and development of software engineering theories and practices.
- Appreciate how an efficient technologybased infrastructure is a key factor in enabling a business to gain a competitive edge.

Who Should Attend

This programme is geared towards practicing software engineers within industry who seek formal qualifications in software engineering. In addition, IT professionals and managers who wish to upgrade their technical software engineering knowledge and IT skills to postgraduate level will find this programme

Modules & Project

The programme comprises 3 pre-requisite modules (for non-Computing students), 10 coursework modules and a Project.

There are 7 compulsory Core Modules and you will have to choose 3 electives from those listed.

Pre-Requisite Modules (For non-Computing students: to be completed upon 1st month of the programme)

- · Software Engineering Principles
- Systems Development Methods
- · Software Design and Development

Core Modules

- Managing Software Development Projects
- Reliability Management
- Object Oriented Software Systems
- Engineering
- Software Engineering Support Environments
- Software Quality Engineering
- Security Technologies
- Research Methodology in Computing and
- Engineering

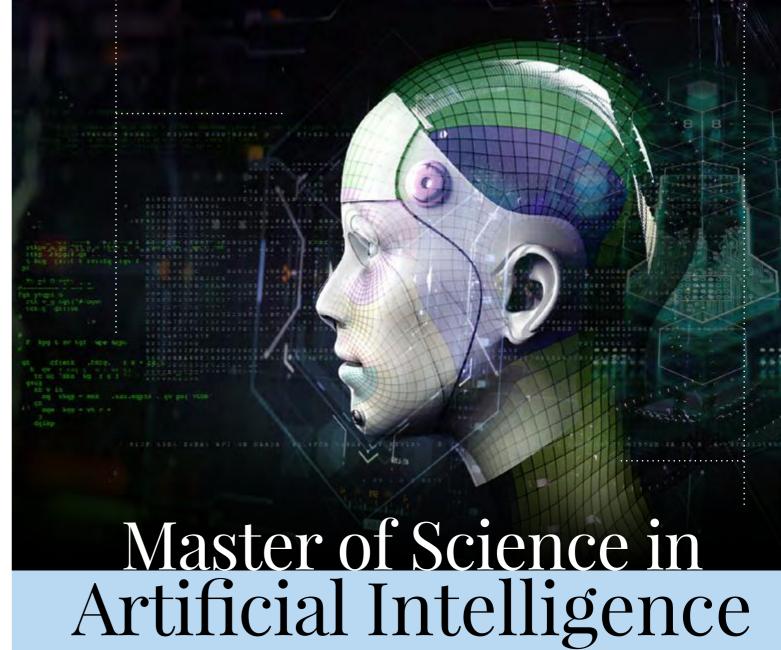

Elective Modules (Choose 3)*

- Internet Applications
- · Network Design & Performance · Data Management
- Big Data Analytics and Technologies
- · Natural Language Processing
- Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester OR among the intensive delivery modules - however such changes may prolong the study duration.

Project

You are required to complete industry-based major projects that are directly relevant to your work and your organisation or any substantial idea from the modules taken.

The project emphasis should involve the derivation of criteria for the selection of software engineering processes, methods and tools, It would be expected that a software prototype, review of current practices or specifications should be produced.

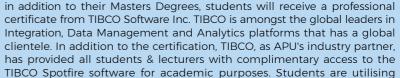

Artificial Intelligence is among the important key areas of focus in the era of Industrial Revolution 4.0. Application concepts and skill sets in areas such as Machine Learning, Natural Language Processing (NLP) & Automation are among the key deliverables of this programme, placing you at the forefront of technology, shaping you to be a part of the most demanded workforce of the future.

Source: https://www.techrepublic.com/article/robots-will-kill-20m-manufacturing-jobs-by-2030/

Duration:

Full-time - 1+ years
Part-time - 2-3 years

This programme is specifically designed to provide:

- Advanced skills and techniques in artificial intelligence
- Research opportunities to solve meaningful industrial problems with artificial intelligence techniques
- Advanced research opportunities in artificial intelligence in preparation for doctoral studies.

Career options

- Software Engineer
- Data Scientist
- Al Researcher
- Intelligence Specialist
- Consultant
- Al Data Analyst
- Machine Learning Engineer
- Robotics R&D Engineer
- Machine Vision Engineer
- Artificial Intelligence Analyst

Deep Learning Scientist

(N/481/7/0811)(06/24)(MOA/FA11933)

The Benefits of the Programme

On successful completion of this programme, you will be able to :

- Gain hands-on experience to implement Artificial Intelligence (AI) to solve problems
- Grasp knowledge on a wide range of subject matters ranging from Machine Learning, Robotics to Natural Language Processing.
- Effectively undertake and manage large scale and complex Artificial Intelligence (AI) projects.
- Engage in the design and implementation of Artificial Intelligence (AI) systems of high quality and reliability.
- Appreciate problems and suggest solutions associated with the development of Artificial Intelligence (AI) systems.
- Appreciate how an efficient Artificial Intelligence (AI) technology based infrastructure is a key factor in enabling a business to gain a competitive edge.
- Draw upon the body of knowledge and be able to overcome human limits to solve new problems using Artificial Intelligence (AI).

Who Should Attend

This programme is geared towards practicing IT/Computing professionals within industry who seek further formal qualifications in Artificial Intelligence. In addition, professionals and managers who wish to enhance themselves with Artificial Intelligence knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Artificial Intelligence / Software Engineering / Data Science background will also find this programme worthwhile as a path to further enhance their academic qualifications.

Modules & Project

The programme comprises 3 pre-requisite modules (for non-Computing students), 10 coursework modules and a Project.

There are 7 compulsory Core Modules and you will have to choose 3 electives from those listed.

Pre-Requisite Modules (For non-Computing students: to be completed upon 1st month of the programme)

- · Fundamentals of Artificial Intelligence
- Programming in Python
- Introduction to R Programming

Core Modules

- · Artificial Intelligence
- Image Processing and Computer Vision
- · Fuzzy Logic
- · Applied Machine Learning
- Computational Intelligence OptimizationNatural Language Processing
- Research Methodology in Computing and Engineering
- Proiect

Elective Modules (Choose 3)*

- · Applied Robotics
- · Pattern Recognition
- Expert Systems and Knowledge Engineering
- Business Intelligence Systems
- Multivariate Methods for Data Analysis
- Deep Learning
- Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester OR among the intensive delivery modules however such changes may prolong the study duration.

Project

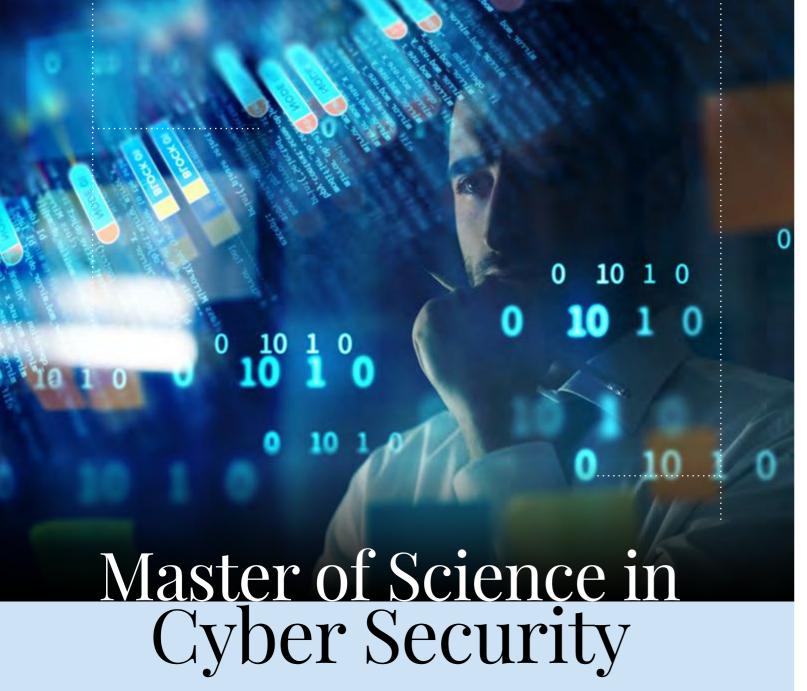

You will be expected to conduct effective research in relation to Artificial Intelligence for both academic and industry purposes. Either route will require you to plan and conduct effective academic research, and produce one academic paper, consultancy report or academic paper in relation to an aspect of Artificial Intelligence.

- TIBCO certification is awarded to students who complete
- Business Intelligence Systems
- Applied Machine Learning
- Deep Learning

/ 30 / POSTGRADUATE STUDIES / 31 /

Rocheston Certified Penetration Tester

The Rocheston Certified Penetration Tester (RCPT) program stresses research, live labs and interactive sessions on emerging security findings, offering the scope for defining the information security requirements while finding options to enhance existing methodology assets. The RCPT certification is designed and embedded as part of Advanced Ethical Hacking module in the Master of Science in Cyber Security programme, to allow the students to have an industry-standard exposure towards penetration testing as well as an opportunity to upskill themselves in real-life scenarios and simulations through the offered CyberLabs. As such, every student in the programme is given equal opportunity in getting their hands on the certification as part of the syllabus learn in the module without the need of taking up additional training resources. Studen can opt for the Rocheston certification which is valid for 2 years and subject to a renewal process to ensure all Penetration Testers are updated with the current scope of Penetration

Certified Hacker Forensics Investigator (CHFI)

Upon completion of the Advanced Digital Forensics module, students will be ready and may opt for the Certified Hacker Forensics Investigator (CHFI) professional certification. The CHFI certification is provided by the International Council of Electronic Commerce Consultants [EC-Council], which is an American organisation that offers cybersecurity certification, education, training, and services in various cybersecurity skills. EC-Council is d headquartered in Albuquerque, New Mexico, and has certified over 237,000 professionals from 145 countries (https:// iclass.eccouncil.org/). CHFI is an advanced cybersecurity certification for forensic network security investigators.

Certified Security Operation Centre Analyst (CSOC)

Upon completion of the Security Operations Center (SOC) & Incident Response SOC module, students will be ready and may opt for the Certified Security Operation Center (CSOC) professional certification. The CSOC examination is certified by the Global ACE Certification where the certification body for the Global ACE Certification is the Information Security Certification Body or ISCB, a department within CyberSecurity Malaysia (CSM). Candidates can take the examination at authorised examination centres in participating member countries. Candidates who have successfully passed the CSOC examination will be eligible to apply as an associate or professional member by fulfilling the membership criteria defined under the Global ACE Certification.

ouration:

Full-time - 1+ years
Part-Time - 2-3 years

This programme is specifically designed to provide:

- Opportunity for professional development at an advanced level within the area of Cyber Security.
- Ability to further develop specialisation gained in taught modules through an extensive research-based and/or technicalbased dissertation, to prepare a subject matter expert in the field.
- APU is also poised to become a frontrunner in cyber security research through the establishment of the Forensics and Cyber Security (FSEC) Research Centre, through which research activities will be undertaken to challenge boundaries in the application of cyber security.

Career options

- Cyber Security Analyst / Consultant
- Information Security Analyst / Consultant
- Cyber Security Incident Response Consultant
- Digital Forensic Investigator
- Cyber Security Engineer
- Information Security Engineer
- Cyber Security Manager
- Information Security Manager

Certification by:

Master of Science in CYBER SECURITY

(N/481/7/0810)(05/24)(MOA/FA11934)

The Benefits of the Programme

- The curriculum covers a wide range of industry relevant subject areas in Security Operations Centre (SOC) and Incident Response, Security Auditing and Assessment, Advanced Ethical Hacking, E-Investigation, Data Analytics in Cyber Security etc.
- External reviews conducted by Cyber Security Malaysia (CSM), KPMC and F-Secure during the development of the programme curriculum.
- Programme Support by an Industry Advisory Panel involving cyber security experts from Cyber Intelligence, Cyber Test Systems, Akati Consulting Group and Cyber Security Malaysia (CSM).
- A fully-functional Security Operations Centre (SOC) that allows students to have handson cybersecurity operations platform to monitor live data which allows them to perform real-time cyber security monitoring to fortify network defense with global threat intelligence and launching faster response on cyber security incidents.
- A full-fledged Cyber Threats Simulation and Response Centre - Cyber Range is also included within the Cyber Security Talent Zone in APU. Cyber Range incorporates latest technologies and a military grade cyber-defence system, enabling students to understand and formulate defence strategies, and practice the entire chain of cyber defence, while preparing them to deal with real cyber threat attack when it happens.
- A technical project related to Cyber Security as dissertation in the final semester.
- Research opportunities for students via APU's Forensic and Cyber Security Research Centre
 FSEC.

Modules & Project

The programme comprises 3 pre-requisite modules (for non-Computing students), 10 coursework modules and a Project.

There are 7 compulsory Core Modules and you will have to choose 3 electives from those listed.

Pre-Requisite Modules (For non-Computing students: to be completed upon 1st month of the programme)

- · Cyber Security
- · Digital Forensics
- Digital Forensic and Cyber Security Tools

Core Modules:

- · Information Security Design
- E-Investigation
- · Cyber Security & Threats
- Security Operations Center (SOC) & Incident Response
- Advanced Ethical Hacking
- · Advanced Digital Forensics
- · Research Methodology in Computing &
- Engineering
- Project

Elective Modules (Choose 3)*

- · Data Analytics in Cyber Security
- Network Design & Performance
 Information Security Architectures
- · Security Audit and Assessment
- Applied Scripting in Cyber Security
- Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester OR among the intensive delivery modules - however

such changes may prolong the study duration.

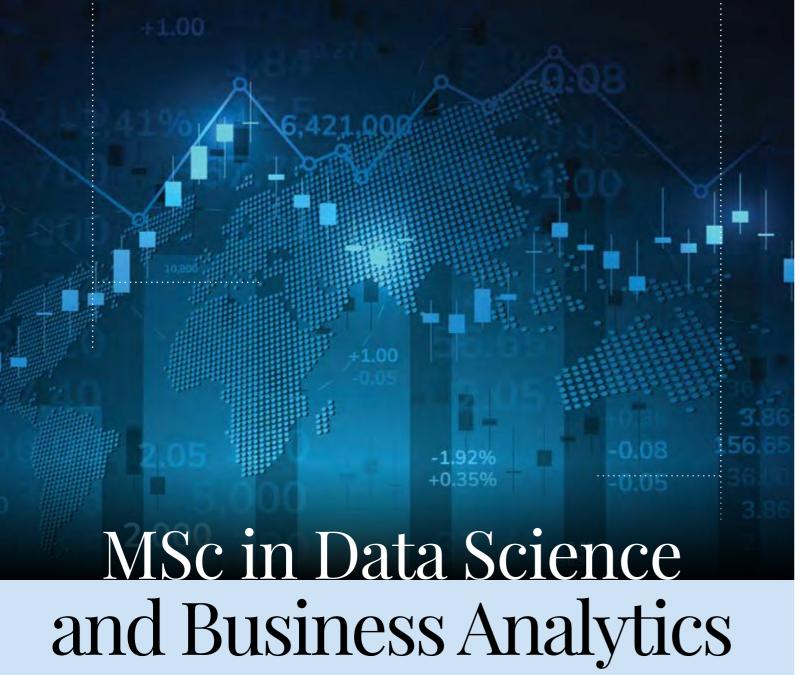

Who Should Attend

This programme is geared towards practicing IT/Computing professionals within industry who seek further formal qualifications in Cyber Security. In addition, professionals and managers who wish to enhance themselves with Cyber Security knowledge and skills to postgraduate level will find this programme attractive. Fresh undergraduate students from Cyber Security / Digital Forensics background will also find this programme worthwhile as a path to further enhance their academic qualifications.

Project

As part of this course, you are expected to complete an extensive project paper in relation to Cyber Security for both academic and industry purposes. This project paper will be supervised by a member of academic staff as the main supervisor It may involve working with an external organisation (probably directly relevant to your work or organisation or any of our industry partners). You are given considerable flexibility in choosing any Cyber Security related topics to base your project paper. As for the deliverables, you are required to come up with a prototype / simulation / framework etc. (the list is just an example and not limited to only these) and to produce one project paper and a publishable conference / journal paper consists of summary of the work.

Data Science @ APU - FORTIFIED through PARTNERSHIPS

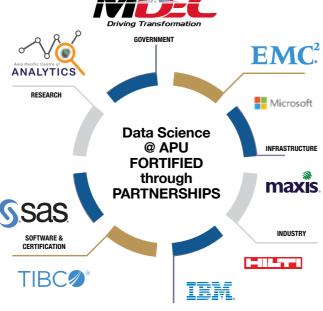

The programme has been carefully designed by APU with inputs and content from our partners, comprising major technology and software solutions providers, university partners as well as industry organisations who use analytics for strategic and competitive advantage.

The strength of these partnerships ensures that the programme comprehensively addresses all key stakeholders - Technology providers, Employers, Government as well as Students - in its learning outcomes, curriculum content, delivery and assessment. Students also obtain certification jointly issued with industry partners, which would certainly give them a head start in the exciting world of Big Data.

Furthermore, APU is also poised to become a frontrunner in analytics research through the establishment of the Asia Pacific Centre of Analytics (APCA), through which research activities will be undertaken to challenge boundaries in the application of analytics.

Graduates from this programme will not only gain an academic qualification from APU, but would also automatically attain a Globally Recognised Professional Industry Certification from SAS. Along the way, graduates would also gain exposure to industrial workshops led by experts from the industry, providing a valuable gateway into future careers.

Duration:

Full-time - 1+ years Part-time - 2.5-3 years

designed to provide:

- Knowledge and applied skills in data science, big data analytics and business intelligence.
- of data science upon modern processes and business
- Exposure towards data science tools and techniques, as well as methods of data collection and utilisation, to tun data into useful information via various processes.
- Data Analyst
- Business Analyst Manager
- Data Innovation Manager
- Business Process Engineer
- Business Intelligence Manager
- · Analytics & Reporting Manager
- Decision Analytics Manager

This programme is specifically

- Overall understanding of the impact

Career options

- Data Engineers
- Business Analyst
- Data Scientist
- Chief Technology Officer (CTO)
- Data Analytics Manager

- Machine Learning Scientist
- Data Wrangler / Munger / Miner

MSc in **DATA SCIENCE AND BUSINESS ANALYTICS** (N-DL/482/7/0168)(03/26)(MOA/PA 14220) - ODL option is available for part-time mode

Modules & Project The Benefits of the Programme

- · In addition to the degree award, a Joint Professional Certification will be offered by SAS
- 30% of the curriculum will allow for mini projects assessed as in-course work allowing for practical skills development in Data Analytics.
- The curriculum covers a wide range of subject matter from Analytical Technologies, Exposure to tools such as R & SAS Modelers, Data Visualisation, Customer/User Behavioural Studies, Forecasting Methods and to Presenting the Business Intelligence reports.
- External Programme Annual Reviews by International University Partners.
- · Programme Support by an Industry Advisory Panel involving data analytical experts from Petronas ICT, RedTone, SharePoint, CyberSecurity Malaysia, Maxis, IBM, Microsoft, Fusionex and Axiata.
- · Research opportunities via APU's Centre of Analytics - APCA.

Who Should Attend

This programme is designed to provide students with knowledge and applied skills in data science. big data analytics and business intelligence. It aims to develop analytical and investigative knowledge and skills using data science tools and techniques. and to enhance data science knowledge and critical interpretation skills. Students will understand the impact of data science upon modern processes and businesses, be able to identify, and implement specific tools, practices, features and techniques to enhance the analysis of data.

- MSc in Data Science and Business Analytic with ODL (Open & Distance Learning) allows students to learn anytime, anywhere at their own pace this power of freedom has ignited more interest 8 excitement in learning.
- The ODL Programme for Data Science and Business Analytics is available for part-time study mode. The minimum duration of study is 2.5 years
- This is an APU own award only.
- Students are to register the modules on a modular basis. Fach module will be offered over a two month duration.

The programme comprises 4 pre-requisite modules (for non-Computing students), 11 coursework

modules and a Capstone Project (2 parts).

Pre-Requisite Modules (For non-Computing students: to be completed upon 1st month of the programme)

- Introduction to R-programming
- Statistics
- Database for Data Science Programming in Python

Core Modules

- Big Data Analytics & Technologies
- Data Management
- Business Intelligence Systems Research Methodology for Capstone Project
- Applied Machine Learning
- Data Analytical Programming
- Multivariate Methods for Data Analysis
- Capstone Project 1
- Advanced Business Analytics and Visualisation
- · Capstone Project 2

Specialisation Modules (Choose 1 Pathway only)

Pathway 1 (Business Intelligence):

- Behavioural Science, Social Media and Marketing Analytics
- Time Series Analysis and Forecasting
- Strategies in Emerging Markets
- **OR** Multilevel Data Analysis
- **OR** Operations Research and Optimization

Pathway 2 (Data Engineering):

- · Cloud Infrastructure and Services
- · Deep Learning
- Natural Language Processing **OR** Building IoT Applications
- **OR** Data Protection and Management
- Specialisation modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester OR among the intensive delivery modules - however such changes may prolong the study duration.

- Business Intelligence Systems
- Applied Machine Learning
- Deep Learning

POSTGRADUATE STUDIES / 39 /

MSc in **INFORMATION TECHNOLOGY** MANAGEMENT

(N/482/7/0149)(07/22)(MOA/FA8835)

Full-time - 1+ vears Part-time - 2-3 years

This programme is specifically designed to provide:

- An opportunity to demonstrate how the application of computer-related technology is an integral part of an efficient business environment.
- An emphasis on the understanding of how an effective computer system is a key factor in enabling a business to gain a competitive and strategic
- An overall consideration of how IT can be managed in the organisation
- An understanding of how strategic IT frameworks can be established to enhance the capability of the organisation.

Career options

- Senior IT Consultant
- IT Recruitment Consultant
- IT Manager
- IT Project Manager
- Technical Support Manager
- Chief Technology Officer (CTO)
- Chief Information Officer (CIO)
- IT Infrastructure Manager
- Innovation Manager
- IT Director

The Benefits of the Programme

On successful completion of this programme, vou will be able to

- Demonstrate professional competencies in one or more specialist branches of IT Management.
- · Draw upon the body of theoretical and technical knowledge available and be able to use this to professional advantage.
- · Communicate effectively in technical and professional environments.
- · Show initiative and independence of thought in technical project planning and design.
- · Appreciate how an efficient technologybased infrastructure is a key factor in enabling a business to gain a competitive edge.
- · Demonstrate a critical awareness of the importance of IT in the development of systems.
- Develop an appreciation of the management context within which software and IT systems are developed.
- Critically analyse, design and evaluate possible developments in a specialised area of discipline in order to further the knowledge and understanding of an IT management environment.

Who Should Attend

This programme is geared towards industry or business professionals who are seeking to develop their careers in the management of technological systems and/or their production for the benefit of organisations. Managers within organisations where information technology plays a vital role in the managerial functions and the efficient operation of the organisation will find this programme very useful.

Modules & Project

The programme comprises 2 pre-requisite modules (for non-Computing students), 10 coursework modules and a Project.

There are 7 compulsory Core Modules and you will have to choose 3 electives from those listed.

Pre-Requisite Modules (For non-Computing students: to be completed upon 1st month of the programme)

- Systems Development Methods
- Software Design and Development

Core Modules

- · Managing Software Development Projects
- Technology Management
- Digital Execution
- Strategic Planning and Systems Development
- Business Intelligence Systems
- · Research Methodology in Computing and Engineerina
- Managing Organisations
- · Proiect

Elective Modules* (Choose 1)

- Internet Applications
- · Enterprise Applications

(Choose 2)

- Information Security Architectures
- Network Design & Performance
- Data Management
- Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester OR among the intensive delivery modules - however such changes may prolong the study duration.

Project

You are required to complete industry-based major projects where possible, however the emphasis must be placed on an effective demonstration of how the application of computer-related technology can be part of the business environment. It is expected that the project would devise, recommend or implement innovative solutions to the problem areas.

Duration:

Full-time - 1+ years Part-time - 2-3 years

This programme is specifically designed to provide:

- An opportunity to understand and appreciate the combination of technology with management.
- A platform to produce capable managers who can effectively manage the dynamic changes that technology makes at all levels.
- An understanding of the needs of management in decision-making.
- An overall appreciation of the manner in which an organisation's strategic business plan drives its technology strategy and infrastructure

Career options

- Business IT Consultant
- BPR Manager
- Business Strategy Consultant
- Chief Technology Officer (CTO)
- Chief Information Officer (CIO)
- Product Manager
- IT Manager
- IT Project Manager
- IT Consultant
- System Analyst
- Technology Consultant

Master of TECHNOLOGY MANAGEMENT

The Benefits of the Programme

(N/345/7/0162)(06/22)(MQA/FA8837)

On successful completion of this programme, vou will be able to

- Demonstrate professional competencies in one or more specialist branches of Technology Management.
- · Draw upon the body of theoretical and technical knowledge available and be able to use this to professional advantage.
- · Communicate effectively in technical and professional environments.
- · Show initiative and independence of thought in technical project planning and design.
- · Appreciate how an efficient technologybased infrastructure is a key factor in enabling a business to gain a competitive edge.
- Illustrate how technology can support strategies to enhance corporate goals.
- Critically analyse design and evaluate possible developments in a specialised area of discipline in order to further the knowledge and understanding of a technology management environment.

Who Should Attend

This programme is geared towards graduates from technical programmes such as engineering and computer science who wish to master managerial skills that are relevant to their background. This programme also appeals to non-technical managers and executives who are increasingly required to manage technology and technical personnel as part of their managerial responsibilities. Graduates seeking senior management careers in high technology or technology intensive businesses are also encouraged to enroll in this programme.

Modules & Project

The programme comprises 4 pre-requisite modules (for non-Computing students), 8 core modules (including Research Methodology module). 2 elective modules and a project. The modules take into consideration issues of quality. management of innovation and technological change. In addition, internationalisation and global perspectives are considered and focus is given to strategic management in order to enhance the coherence of the programme.

Pre-Requisite Modules (For Non-Business students: to be completed upon 1st month of the programme)

- Business Environment & Strategic Planning
- **Understanding Customers**
- Managing People
- Managerial Finance

Core Modules

- Managing Creativity and Innovation
- Business Intelligence Systems
- New Product Development & Innovation
- Statistical Decision Making
- Research Methodology in Computing and Engineering
- Technology Management
- Technology, Culture and People: A Global Perspective
- Entrepreneurship in Asia
- Project

Elective Modules (Choose 1)*

Business Administration

MASTER OF BUSINESS ADMINISTRATION - MORE THAN JUST AN MBA

In this age of digital transformation, being equipped with digital, technical & analytical skills in addition to profound business skills & professional knowledge makes you stand out among the rest. As an MBA @ APU student, you will be exposed to modules in business intelligence & data analytics & technology management, which will shape you into competent business leaders upon completion of the programme.

"MBA GRADUATES CONTINUE TO COMMAND A SALARY PREMIUM COMPARED TO DIRECT FROM INDUSTRY HIRES AND BACHELORS **DEGREE HIRES" - GRADUATE MANAGEMENT ADMISSION COUNCIL** (GMAC) SURVEY

of business school graduates stated that their MBA degree was beneficial personally even during recession time" - Graduate Management Admission Council (GMAC) Survey

of companies plan to hire MBA graduates" - Graduate Management Admission Council (GMAC) Survey

"Typically, those applicants with a Master's degree or MBA will be hired with one or two grades higher than degree holders... about an 8% higher salary depending on the field or industry they plan to join". - Lee Chun Keat

Director of Engineering, Oppstar Malaysia

The MBA is a popular platform for career progression (Lessler, 2018), providing students with a set of transferable skills and knowledge to allow them to lead and make decisions in management positions. With its emphasis on personal growth, networking and challenging complexity, MBA graduates are well prepared for the future jobs market and the continued demand for MBA talent.

"Information is the oil of the 21st century, and analytics is the combustion engine."

> - Peter Sondergaard, Senior Vice President, Gartner Research (2014)

TESTIMONIALS BY OUR MBA GRADUATES

"Driven by state of the art technology on all fronts and boasting of a well-equipped faculty, I was conditioned and nurtured in a way that has helped me thrive in some of the most challenging environments ever since I graduated with a MBA." - Arjun Narayanan

Content Manager, IIMResume, India

"APU's environment well adapted for students' needs and wants. I learned how to be optimistic and to be a fast learner. It was undoubtedly a life changing experience. "

> Chief Manager of the Board Office of "University Medical Center" Corporate Fund in Nur-Sultan City, Kazakhstan

- Put plans into action with the experience learned from the successful entrepreneurs and a solid understanding of the realities of a business especially in financial or investment related areas.

Who Should Attend

This degree is intended for finance professional looking to widen their skill base, or students who have made a professional commitment to pursue a career in the finance industry and who have studied finance in an undergraduate degree and are interested in equipping with the most comprehensive array of analytical tools and techniques. This Masters of Finance could be a stepping stone to one of the most soughtafter careers in the finance sectors broadly defined as corporate finance, security analysis, portfolio management, options and futures, treasury management, the functioning of financial institutions and markets, and financial decision-making.

Modules & Project

This programme comprises 10 coursework modules (including Research Methodology module) and a project. The modules are designed to provide a solid understanding of financial principles and their applications of those understanding to various aspects of the finance industry. The students are able to act autonomously in planning and implementing financial strategies which include Financial Analysis, Quantitative Methods, Investment Management and Financial Markets as well as Corporate Finance.

Modules

- · Quantitative Methods for Decision Making
- Securities, Futures and Options
- · Financial Regulation and Regulatory Policy
- · Financial Markets and Institutions
- Corporate Finance
- · Financial Statement Analysis
- · Fixed Income and Equity Investment
- · International Finance
- · Investment and Portfolio Management
- Research Methodology
- Project

Project

You will be expected to conduct effective research in relation to Finance for both academic and industry purposes. Project will provide you an opportunity to study a topic related to Finance in the form of a written report. You are required to develop your chosen research study by conducting literature reviews, engaging with research methodology, developing skills in data collection and analysis. At the end of the study, you will produce and present a report conforming to the conventions of academic writing.

Master of Finance with a specialism in FinTech

FINTECH FOR THE FUTURE

Financial Technology (FinTech) is gaining momentum year-on-year and creating a huge demand for professionals with specific FinTech skills. Traditional accounting and finance industry is getting digitally transformed. To cater to the skill gap in the Financial Services the technology application has become an essential part of the graduate skill.

Traditional financial institutions and FinTech start-ups alike are looking for more candidates who specialise in Artificial Intelligence, Machine Learning, Data Science. According to Bloomberg reporting and data from LinkedIn[1], job listings requiring these skills in the financial services industry increased nearly 60% in the past year. APU Master of Finance (FinTech) programme is designed to cater to the increased demand for finance graduates with FinTech skills.

"FinTech is massively popular. 96% of global consumers are aware of FinTech-driven money transfer and payment services. 3 out of 4 consumers have used an alternative money transfer and payment service."

- EY Global FinTech Adoption Index

FINTECH FOR THE FUTURE

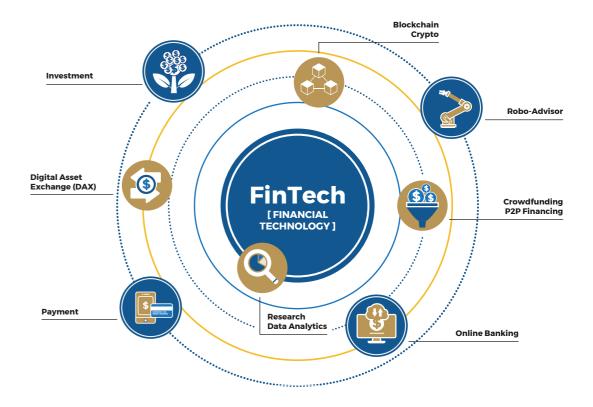

60% of consumers want to transact business with financial institutions with a single platform, such as social media or mobile banking apps. (Ernst & Young) "Global FinTech market investments have seen a 28% year-on-year rise from 2018 to 2019." (Tranglo) In 2017, 88% of incumbent financial institutions feared that they would lose money to the disruptive innovation of FinTech companies, but 82% plan to partner with FinTech startups in the next 3–5 years. (PwC)

In 2019, 64% of consumers worldwide have used one or more FinTech platforms, up from 33% in 2017. (Ernst & Young)

"Financial institutions are becoming more technology focused. We see it as the evolving intersection of financial services and technology. Looking forward, we expect FinTech disruptors to continue to expand into other areas within financial services."

- Pricewaterhouse Coopers (PwC)

"FinTech is changing businesses and customers rapidly. Those that embrace FinTech will stay at the forefront of their markets; those that don't will lose out on opportunities, customers, and market share."

- Bernard Marr, Forbes

Master of **FINANCE** WITH A SPECIALISM IN FINTECH

(R/343/7/0098)(10/23)(MOA/FA3456)

Full-time - 1+ vears Part-time - 2-3 years

This programme is specifically designed to provide:

- Solid in-depth knowledge in the theory and practice of decision making needed to face the challenges in the FinTech industry.
- An understanding of the demanding financial environment and its key areas at a global level.
- Specialised financial knowledge and tools to move from theory to real-world applications needed for a graduate to be at the forefront of the FinTech world.
- FinTech knowledge and technical skill relevant to Finance.

Career options

- Cybersecurity Analyst (Financial Services)
- Data Analyst (Financial Services)
- Finance Manager
- Insurance Manager
- Securities Trader
- Financial Planner
- Investment Banker • Fund Manager
- Wealth Manager
- Financial Analyst
- Chief Financial Officer (CFO)
- Risk Manager
- Credit Analyst

The Benefits of the Programme

On successful completion of this programme, vou will be able to:

- · Understand the financial system and the linkages of financial institutions and markets to corporations, individuals and governments.
- Understand the financial technology (FinTech) ecosystem and the developments that shape the financial industry in the 21st century.
- Acquire the necessary skills to be a successful financial enthusiast championing financial solutions in the 21st century.
- · Interpret principles & understandings of financial workings in the world of FinTech.
- · Apply qualitative and quantitative techniques in analysing problems in Finance & Technology and solve complex, unstructured finance or investment related problems.
- Perform advanced methods and procedures in solving complex problems by extending the knowledge of the Finance discipline into more specialized areas.
- · Employ digital skills such as word processing, the web and econometric packages in analysing financial data while conducting research in a professional field.
- Demonstrate advanced numeracy skills in solving complex problems.
- · Apply experience learned and solid understanding of the realities of a business especially in FinTech related areas.

Who Should Attend

This degree is intended for finance professionals looking to widen their skill base or students who have made a professional commitment to pursue a career in the financial service industry with a focus on FinTech skills and who have studied finance in an undergraduate degree and interested in equipping with the most comprehensive array of analytical tools and techniques. This Master of Finance (FinTech) could be a stepping stone to one of the most sought-after careers in the finance sectors broadly defined as corporate finance, security analysis, portfolio management, financial technology, and the functioning of financial institutions and markets.

Modules & Project

The programme comprises 1 pre-requisite module (for non-Computing students), 10 coursework modules and a Project.

The modules are designed to provide a solid understanding of financial principles and technology applications of those understanding to various aspects of the finance industry. The students are able to act autonomously in planning and implementing financial strategies.

Pre-Requisite Modules (For non-computing students: to be completed upon 1st month of the programme)

Fundamentals of Artificial Intelligence

- Cybercrime and Investigation
- Corporate Finance
- · Financial Statement Analysis
- Financial Markets and Institutions
- Financial Technology
- Artificial Intelligence
- International Finance
- Research Methodology Investment and Portfolio Management

Big Data Analytics and Technologies

Project

Project

You will be expected to conduct effective research in relation to FinTech for both academic and industrial purposes. Master of Arts in Design Innovation Management

The Masters of Arts in Design Innovation Management programme will enhance graduates managerial skills and develop interdisciplinary knowledge through both theoretical and practical modules on a range of topics relevant to contemporary design management issues.

The interdisciplinary blend of design, innovation and management in this programme will enable graduates to develop critical approaches and practices that enhance their effectiveness as a practitioner, to enable graduates to pursue a broad range of design management careers in the private and public sectors relevant to the world of today.

/ 56 / POSTGRADUATE STUDIES POSTGRADUATE STUDIES / 57 /

Master of Arts in **DESIGN INNOVATION MANAGEMENT**

(N/214/7/0206)(05/26)(MOA/PA14558)

Full-time - 1+ years

This programme is specifically designed to:

- Extend design innovation management programme to different organisations that consider design to be a strategic competitive
- Meet the growing demand for advanced skills in design management and leadership in the various services and business.
- Prepare graduates to meet the of advanced design technology and implementation of new management approaches.

Career options

- Project Manager
- Design Producer
- Brand Manager/ Strategist
- Marketing Manager
- Product Manager
- Account Manager
- Client Manager
- Chief Design Officer
- Design Researcher Design Strategist
- Service Designer/ Design Experience Strategist
- Venture Architect

The Benefits of the Programme

- · Innovation and management from a creative perspective, within a world-leading art and design institution with strong link to the creative industries.
- Apply Design Thinking to real-world challenges, design collaboratively, engage critically and creatively with others and learn from shared experiences.
- An interdisciplinary programme informed by theories drawn from a range of design. business and humanities areas and delivered through projects and collaborations.
- · Gain insight into creative briefs, target audiences and markets, through Design Management and Innovation.
- Benefit from diverse potential employment routes including setting up your own business, in-house and external design leadership roles. cultural positions and agency management

Who Should Attend

This programme is geared towards graduates who have graduated from design backgrounds who wish to master managerial skills that are relevant to their previous experience. This programme also appeals to non-design field managers and executives who require design management skills as part of their managerial responsibility.

Modules & Project

The programme comprises of 9 coursework modules (including Research Methodology module) and a project named Creative Futures Project. There will be a combination of management context and design context in the modules. Throughout the semester you will be

Pre-Requisite Modules (For non-Business students: to be completed upon 1st month of the programme)

- · Managing People
- · Understanding Customers
- · Managerial Finance
- · Business Environment & Strategic Planning

- Design and Creative Industries
- Business Planning for Creative Entrepreneur
- Research Methodology
- Design Thinking
- · Integrated Brand Management
- · Future Media Innovation
- Service Design
- Project Feasibility Study
- Creative Futures Project

Elective Modules (Choose 1):

- · Intellectual Property
- · Creative Sustainability
- Technology Management
- · Design for Retail
- · Managing Business Web Presence
- * Elective modules may be pre-selected for students at the beginning of the semester. If students wish to change these pre-selected elective modules, they can choose from the available modules offered in the semester OR among the intensive delivery modules - however such changes may prolong the study duration.

Project

For the final project module named Creative Futures Project, you will need to complete an industry-based major projects along with evidence and output related to the Design Innovation Management field There will be a final exhibition and presentation towards the end of the course.

Full-time - 2 years

Part-time - 3-4 years

This programme is specifically designed to provide:

• Knowledge to enhance technical

capabilities within the subject area.

Understanding of how to innovate,

generate and manage the creation of

domain of knowledge, that is related

Conversion to PhD

the criteria below-

- (b) Able to demonstrate the potential of their project to be expended to PhD level.
- (c) Pass a rigorous assessment.

Successful conversion means that the student will no longer be a Research Degree candidate but will instead become a PhD candidate with their candidature start date backdated to their original Research Degree registration date. Hence, it allows the student to gain a PhD award within a shorter timeframe, without the need to complete a Masters programme.

Master of Philosophy in **ENGINEERING** (R/520/7/0071)(04/25)(MQA/FA6112) Master of Philosophy in MANAGEMENT (R/345/7/1048)(05/29)(MQA/FA9018) Master of Science in **COMPUTING** (N/482/7/0148)(06/22)(MOA/PA9019)

Modules & Assessments

Students of the Research Degree programme may convert to a PhD candidate if they satisfy all

- (a) Display excellent progress in their research.

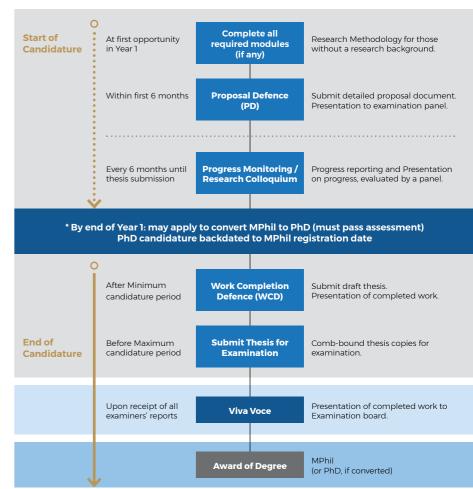

This programme is conducted by research and is assessed via oral presentations and reports at various junctures, including a Proposal Defence, regular half-yearly progress monitoring at research colloquiums, Work Completion Defence, Thesis Examination and Viva Voce.

Students would need to take one taught module on Research Methodology to gain the pre-requisite knowledge to effectively carry out their research. Regular discussions with the supervisors would be expected to ensure the direction of research as well as the quality and significance of the findings.

Programme Structure / Process Flow

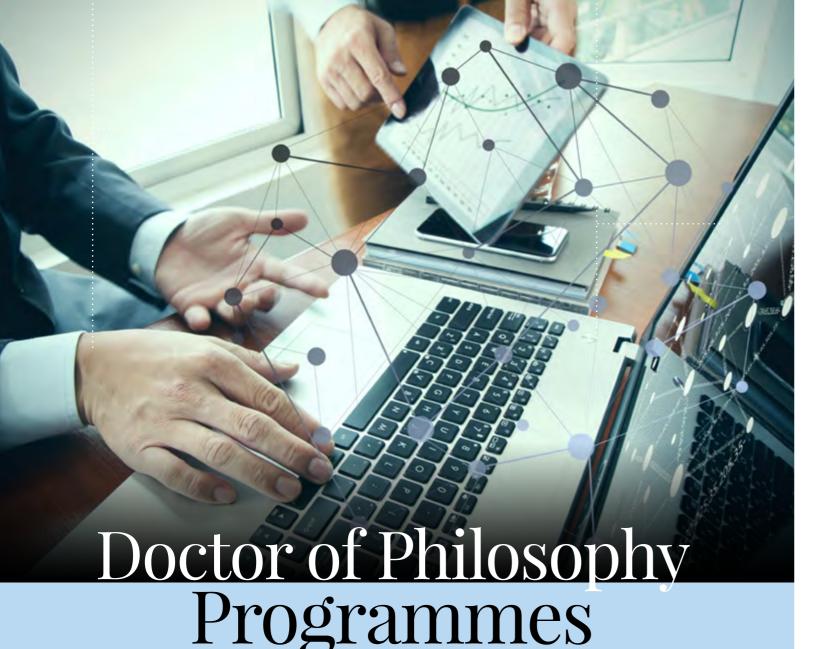

Application Process

Ideally, student works with potential supervisors to develop proposal.

/ 58 / POSTGRADUATE STUDIES POSTGRADUATE STUDIES / 59 /

- PhD in Technology (N-DL/482/8/0173)(11/27)(MQA/PA14011)

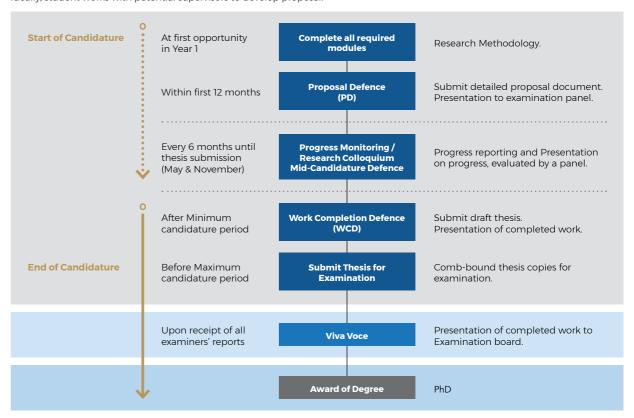

Why our APU PhD by Research Programme?

- You will be assigned to a group of highly qualified supervisors.
- Wide range of latest research areas in the fields of computing and business administration areas.
- We have our regular research workshops, colloquium and seminars facilitated by local and international academicians and professionals.
- Comprehensive Student Support Services.
- Resourceful online databases.

PROGRAMME STRUCTURE

Application Process

Ideally, student works with potential supervisors to develop proposal.

DURATION FOR PhD

The minimum and maximum duration of the PhD programme are as follows:

Study mode	Normal minimum period*	Normal maximum period**
Full Time	3 years	5 years
Part Time	4 years	6 years

- * Completion of studies is subject to approval from the Senate ** Candidates with Extenuating Circumstances may apply for approval to extend the duration of study
- Students are required to enrol in the Research Methods module to fill the gaps in research skills.

Minimum Entry Requirement

- A Masters degree in a related field accepted by the APU Senate
- Other qualifications equivalent to a Masters degree that are accepted by the APU Senate

Doctor of Business Administration (DBA)

- Master's degree (Level 7, MQF) or its equivalent accepted by APU Senate
- Work Experience
- > Applicants must have recent and relevant study or practice in business or management > Submission of Curriculum Vitae (CV) or Resume will be required. An interview session will be conducted with all prospective candidates

Doctor of BUSINESS ADMINISTRATION

(N/345/8/1089)(04/28)(MOA/PA14557)

Duration:

Full-time - 3 years Part-time - 4 years

This programme is designed for executives, professionals and leaders to prepare them for digital transformation, by:

- Applying innovation and technology in problem-solving—guided by Design Thinking ideals.
- Employing real-world coaching and providing an entrepreneurial outlook via our in-class and value-added activities
- Participating in thought leadership staff and Industry partners.
- Learning and collaborating in a highly dynamic and interactive world-class environment.
- Future-proofing themselves and enabling them to lead digital transformation in organisations.

Career options

- Management Analyst
- Business Research Analyst
- Market Research Analyst
- Entrepreneur
- Economist
- Professor Chief Marketing Officer (CM0)
- General Manager
- Analytics & Reporting Manager
- Decision Analytics Manager
- Management Consultant
- Chief Executive Officer (CEO) · International Marketing Manager

The Benefits of the Programme

- The APU DBA prepares you to address the challenges within an increasingly Volatile. Uncertain, Complex and Ambiguous (VUCA) digitalised world.
- The knowledge and experience gained via APU's DBA will allow you to sharpen your skills and competencies in decision making, strategic thinking, and problem solving be it for work or personal aspirations. The programme is also designed to enhance your research skills which can be applied to strategic formulation, policy formation and organisational risk assessment and mitigation
- The APU DBA programme has a unique digital emphasis and is a technology-infused leadership programme that focuses on future-proofing leaders in a highly volatile and uncertain future. The content of each module is carefully designed through collaboration with business and covers the following topics:
- 1. FinTech developed through professional engagement with MyFin.
- Economics teaching & research content infused through consultation with professionals from the Economic & Social Research Council, UK (UKRI).
- Digital Thinking inclusion of professional talks/seminars/guest lectures by Startup Malaysia and other organisations, powered by Design Thinking principles.
- Leadership collaborative case studies from the Engineering Council UK (ECUK) via the Education & Skills Strategy Board of IMechE-UK
- Data Science supported by software tools powered by SAS Institute Inc (USA).
- Data Science supported by software tools powered by SAS Institute Inc (USA).
- Marketing research content in consultation with Marketing Research Society of Malaysia (MRSM).
- The Malaysian Institute of Accountants (MIA) has endorsed APU DBA to enhance and progress existing business knowledge, gaining perspective of contemporary business issues, future trends, and complex problems that require analytical skills to solve.
- · Under a strategic collaboration with the Chartered Management Institute, UK, you have the exciting opportunity of enrolling for the exclusive APU-CMI Dual Certification by adding a separate CMI qualification to your APU qualification, you are really on the road to success to be truly recognised globally as a Professional Manager.

Modules & Dissertation

The emphasis of the DBA programme is on collaboration, interpersonal relationship building and applied experiential learning. Students are required to complete 10 taught modules on the DBA which are delivered in a combination of online and face-to-face blended learning modes depending on the module.

Modules

- · Strategic Management for Integrated Value Creation
- FinTech and Corporate Financial Strategy
- Advanced Marketing Intelligence and Research
- Research Methodology
- Leadership and Organisational Science

Data Science and Business Analytics

- Digital Thinking and Innovation Management
- Quantitative Research OR Qualitative
- · Digital Business Transformation
- Global Economic and Business Issues Dissertation

The modules are assessed through flexible assessment methods with minimal examinations, catering to the needs of busy working professionals

Instructional Design and Delivery

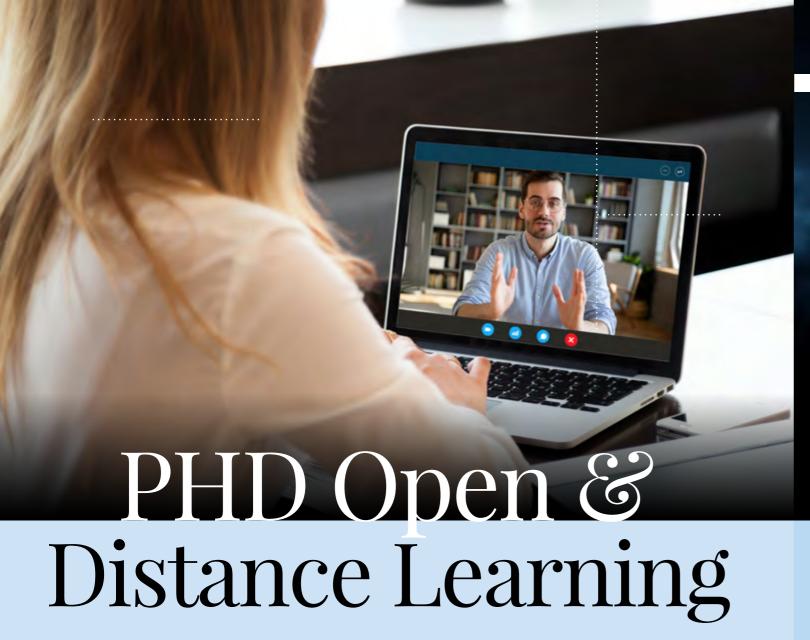

Learning is supported by materials, tasks, and activities provided through the Institution's Learning Management System. The fundamental delivery mode of the programme encompasses the following:

- Face to Face Learning
- Guided Online Learning
- Self-Managed Learning Group Discussions and Presentations
- Case Study Analysis · Seminars and Discussions with Guest

Endorsed by:

/ 62 / POSTGRADUATE STUDIES POSTGRADUATE STUDIES / 63 /

- The ODL (Open & Distance Learning) PhD programmes are designed to address the theoretical, practical and scientific skills and contribute towards new and meaningful knowledge in their field of expertise.
- · ODL allows students to learn anytime, anywhere at their own pace this power of freedom has ignited more
- · Students will reinforce their independent learning skills, as well as demonstrate their ability to produce a
- · The supervision and monitoring will be conducted via Microsoft Teams and Moodle.
- · There is an option to undertake additional research workshops organised jointly by Graduate School of Technology and Graduate School of Business.
- Students must participate in online research seminars/colloquiums/conferences.
- For PhD in Computing/Technology, students are required to publish 1 journal article (indexed) as a requirement
- · Assessment of the fundamental knowledge is carried out through assessment of the students' performance based on oral and written assessment. The final assessment is the viva voce and the dissertation.
- Open Distance Learning (ODL) PhD students at APU will need to take the Research Methods Modules and subsequently produce the Dissertation.

World-class R&D and Innovation

ACADEMIC RESEARCH

For our staff, learning is a continuous journey where we keep abreast with the latest knowledge in a variety of fields. Our academic staff publish papers and present them at conferences worldwide. Some of the areas of research include:

- · Embedded Systems & RFID
- Biometrics
- Games Engines · 3D Graphics and Virtual Reality
- Security
- · New Media Technologies
- Knowledge Management Mobile Learning
- Wireless Networks and Internet of Things (IoT)
- · Adding Facial Expressions to Talking Head Models
- Marketing Professional Services
- · Two and Three Dimension Audio-Visual Speech Synthesis
- · Handwritten Signature Verification Using a Single **Master Signature**

- · Customer Care
- · E-Learning
- Entrepreneurial Business
- · Various Aspects of Accounting International Marketing
- · Generation of Business Ideas
- · Organisational Culture Change · Strategic Diversification Evaluation
- Cloud Computing
- · Security and Forensics
- Internet of Things (IoT)
- Malware Analysis
- Big Data

INNOVATIVE INDUSTRY-BASED RESEARCH CENTRES @ APU

Malaysia's First Integrated Cybersecurity Talent Zone

APU's Cybersecurity Talent Zone is a clear and perfect example of how APU collaborates closely with industry leading organisations to expose students to best-in-class technologies and systems. This Zone features a fully-functional Security Operations Centre (SOC) that allows students to have hands-on cybersecurity operations experience. APU's Cyber Security students are able to actively analyse occurrences of cyber-attacks and plan counteractive measures towards cyber threats through real-time data.

In addition, a full-fledged Cyber Threats Simulation and Response Centre (also known as a Cyber Range) is also located within the Cyber Security Talent Zone. The Cyber Range incorporates latest technologies and a military grade cyber-defense system that can simulate highly complex cyber-attacks in a hyper realistic environment, enabling students to understand and formulate defence strategies, and practice the entire chain of cyber defence, while preparing them to deal with real cyber threat attack when it happens. The Cyber Range is among the best-equipped facility of its kind across the Asia Pacific region.

APU's CISCO Networking Academy, its Centre for Research and Development in IoT (CREDIT) and its Forensic and Security Research centre also make up the APU CyberSecurity Talent Zone, which is truly a unique, end-to-end integrated facility to provide hands-on experience to our students - the global cybersecurity, networking and IoT talents of the future.

Asia Pacific Centre of Analytics (APCA)

Asia Pacific Centre of Analytics – APCA is established in association of multi-discipline expertise from various schools in APU. The vision of APCA is to establish the foundation to develop young data scientists to meet the demands in Malaysia and global. The expertise and experience cover areas of Data Management, Machine Learning, Behavioral Studies, Business Cases, Statistics and Engineering. The formation directs to broad activities in Big Data ecosystem, in line with National vision to make Big Data Analytics the catalyst for nation's economic development: Creating new area in BDA studies, Embedding BDA topics into Undergraduate and Postgraduate studies, Development of Educational and Industrial Framework, Creating Project Marketplace, Research project commercialisation and crowdfunding, Consultancy and Training Services.

Centre for Research and Development of IoT (CREDIT)

The establishment of Centre for Research and Development of IoT (CREDIT) is a significant milestone that supports the objectives of the Malaysia National IoT Strategic Roadmap initiative. CREDIT aims to provide students and academic staff the opportunities to access IoT-related knowledge and know-how through various activities. It also acts as a hub to support commercialising potential state-of-the-art solutions resulting from R&D projects.

APU IEEE Student Branch

APU IEEE Student Branch, which is part of the Malaysia Section under Region 10 (Asia and Pacific), was formulated in 2014 As a member of IEEE, APU students have a wide variety of resources and valuable opportunities to advance their knowledge and future career. APU Student Branch provides numerous educational, technical, and professional development for its members through special projects, activities, meetings, tours and field trips.

Forensic and Cyber Security Research Centre (FSEC)

The establishment of Forensics & Cyber Security (FSec) center is to be a recognised Forensics and Cyber Security Research and Development Centre which acts as an international resource for government, industry and academia. This vision has kept us on the toe and with the closing of all cases including expert testimonies given by our dedicated analysts.

Centre for Innovation and Entrepreneurship (CIE)

The Centre provides resources for staff and student to innovation and entrepreneurship in a form of a sandbox; supports curricular and co-curricular programming, including workshops, networking events, speakers, talks and internship and start-up programs. Students have access to laboratory space, and other resources to meet their entrepreneurial needs.

Integrated Sustainability & Urban Creativity Centre (ISUC)

ISUC is committed to the mission of cultivating "sustainable shaping and innovating" leading us to be needed by the new era. The overall goal of the research centre is to establish an international, innovative, forward-looking and research-oriented world-class of think tank comprising of students and academic staff researchers with great sense of mission of the era, international perspective and native characteristics.

APU 5G Research Lab

The APU-5G research lab was established to serve as a platform for members from academia, business and industry to collaborate on 5G research to create market ready, innovative 5G technology solutions, applications and business ventures. The APU-5G research lab facilitates research at circuit, system and network level in 5G technologies and also is focused to the pathway for 6G technology to develop a powerful, faster, greener, sustainable network which will be smarter with infusion of Al, ML and Reinforcement learning.

The research lab aims at exploring the cutting edge technologies such as SDN, NFV, mm/THz Wave Band, Radio Access, Massive MIMO, D2D Communication, Ultra Densification, IoT, Big Data, Mobile Computing and fusion of AI and ML for development of SC core and Radio Access Network Infrastructure. The developed 5G Network Infrastructure will be a platform to develop and test a range of use cases of primary, secondary and tertiary industries and business that are built on communication infrastructure. The 5G lab in association with the other research centers of APU will facilitate research in 5G network security, Network Data Collection and Analysis for Smarter 5G/6GNetwork and Highspeed Sensor Networks for Autonomous Industry.

APIIT Education Group is the proud recipient of Prime Minister's Award and Export Excellence Award (Services) for Industry Excellence Awards - March 2011

The APIIT Education Group received the prestigious Prime Minister's Industry Excellence Award from the Prime Minister of Malaysia. Only one organisation was selected to receive the Prime Minister's Industry Excellence Award from among nearly 30 other award recipients in 8 different categories. The Industry Excellence Awards, organised by the Ministry of International Trade & Industry (MITI), recognises and rewards organisations for organisational excellence including competitiveness. innovativeness, market presence and export performance. Winning the Prime Minister's Industry Excellence Award is a significant milestone and an honour for APU as a leader in higher education. The award truly reflects our commitment and focus on quality, innovation, graduate employability and internationalisation.
